Our Story

Sweet cherry cultivation in Croatia has a long and renowned tradition. And right here, embraced by the Mediterranean sea with more than 200 sunny days a year lies our orchard with 26,000 trees, an area more than 40 hectares.

The Cro Cherry orchard has been cultivated with care and love for over 10 years. The idea that leads us in addition to our customers and visitors having the opportunity to taste highest quality cherry in Europe, is to afford our visitors an active holiday in the beautiful nature of the Croatian field.

What you will see

At our orchard you will meet our team who will tell you all the attractions of our destination. You will find out what kind of cherries exist in the world and when they mature. Whether you choose to visit the orchard in spring, early or late summer, you will surely see a cherry blossom in one field, and already in another field you can try cherry that is ready to be picked. Walking through the orchard you will take a break by the wellhead and refresh with flowing natural spring water. After visiting the orchard, our plantation manager will take you to the Cro Cherry factory and there you can see all technological processes of receiving, sorting and packaging the product.
